INSTALLATION TIPS

01 Inspect all product prior to installation for any visible defects or unacceptable colour/ shade variation. Claims are not accepted after installation.

02 Lay the tiles according to the direction indicated on the bottom of the billet.

03 Soak the tiles before laying.

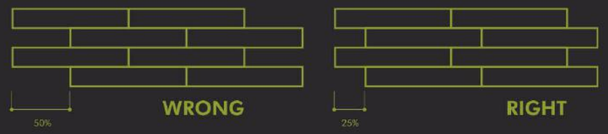

04 A1/4" square-notched trowel is suggested for applying the thin set.

05 Before grouting, allow the mortar base to dry for 24-48 hours

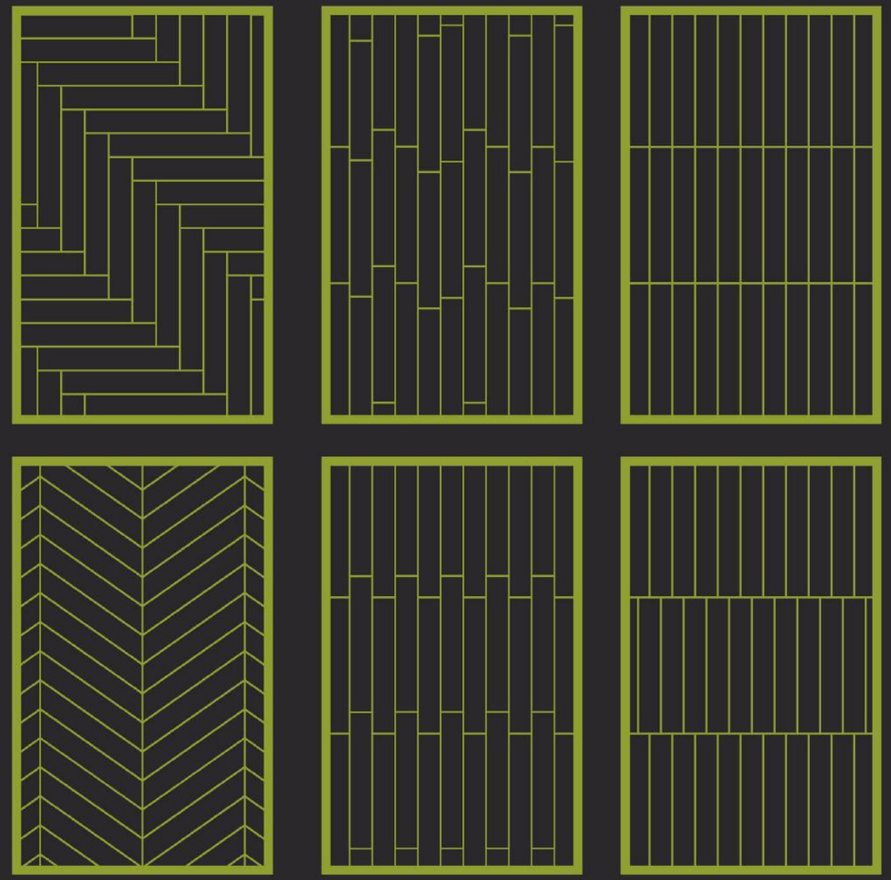

06 The tiles can be cleaned with clear water and /or a neutral liquid cleaner.Apply the cleaning solution to the properly installed tile using a cloth mop or non-abrasive towel.
Follow the application with a clear water rinse and wipe dry to prevent film formation.

07 Sealing the tile is not recommended, and acid cleaning the tile may result in substantial harm to the product; therefore if either of these applications are performed it will specifically void the warranty.

08 INSTALLATION OF RECTANGULAR TILES:
Staggered space should be kept within 10cm-15cm (For 10cm x 60cm, 15cmx60cm,20cmx 60cm,30cmx60cm,and 47cmx120cm rectangular tiles) to compensate for the warpage of rectangular tiles. It is important to keep 2-3mm gap.

Each different tiles series is produced to meet different performance requirements. For specific product technical performance, please request from WIFi sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristics of porcelain tile.
